Summary Statement

Chris Poskitt is an Associate Professor of Computer Science (Education) at Singapore Management University (SMU), where he is a member of the Centre for Research on Intelligent Software Engineering. Prior to SMU, he held research and teaching positions at ETH Zurich, Switzerland, and the Singapore University of Technology and Design. His research broadly addresses the problem of engineering correct and secure software/systems, towards which he has co-developed techniques for testing/defending cyber-physical systems, tools for analysing execution models of concurrency APIs, and logics for reasoning about the correctness of graph-rewriting programs. His research interests span software engineering, formal methods, cybersecurity, and computer science education.
